

Dear Robert,

Just wanted you to know that your bee prep-series materials were extremely helpful to our son, Will DiGrande, who won the NJ state Geo Bee on 4/5. This was his 3rd attempt but the first time he prepped with your kit. Getting free questions a few times/mo were kept him engaged. On the way to the bee in the car, Friday morning, we were using one of your guides as a warm-up and Will answered a question wrong regarding which state has “ Craters of the Moon” national monument. He noted the correct state is Idaho and don't you know he had that very question in the final round during the bee just a few hours later.

Keep up the good work. We are referring your study materials to several prospects for next year.
